GM recalls nearly 200,000 SUVs

-, 19.06.2013, 03:11 Time

USPA News - Auto-maker General Motors (GM) on Monday announced the recall of nearly 200,000 SUV`s, regulators said. Among the SUV`s involved in the recall are 2006 model year Chevrolet Trailblazer EXT and GMC Envoy XL SUVs, as well as 2006 and 2007 Chevrolet Trailblazer, GMC Envoy, Buick Rainier, SAAB 9-7x, and Isuzu Ascender SUVs.

The recall involves 193,652 vehicles. According to the U.S. National Highway Traffic Safety Administration (NHTSA), a short in the circuit board could lead to a fire, increasing the risk of personal injury, detailing that a fire could occur even while the vehicle is not in use. Furthermore, the NHTSA advised owners, as a precaution, to park outside until the remedy has been made. GM said an inspection of such vehicles is to take place, and in the case of a faulty vehicle, the driver`s door module would be replaced.
